

Jackson's SuperKids
Problem solving of the Week!

The Problem of the Week will be posted in hallway and e-mailed to teachers.

Kids will have the option to do, or not to do the Problem of the Week. The kids that choose to do the problem will turn their work into the teacher, who will then put students work in an envelope and give it to Carla at the front desk by Friday noon.

Names will be drawn from each grade level and prizes/rewards will be given out once a month. A group picture will be taken and hung in the hallway.

Look for something big to happen at the end of the school year for participating students.

K/1st Grades

The farmer plowed 3 rows in which to plant corn and 2 rows in which to plant sunflowers. How many rows did the farmer plow?

2nd/3rd Grades

The second and third grades began the year with 18 packages of drawing paper. At year's end, only 3 packages were left. How many packages of drawing paper had the students used during the year?

4th/5th Grades

Five towns in Calistoga County each had 896 students that were writing pen pals in Europe! How many students in all were enjoying friendships by way of letter-writing?
