

After careful review of the reports from the Assessment Team, Safety Officer and Administrators, we have decided to reopen schools on Monday, Nov. 9. At that time all students will return to school for a full day of instruction via transportation schedules as previously established.

Through the remainder of this week and weekend, the contractor along with the support of our maintenance and custodial work force, will complete all necessary corrections to any safety concerns, return all classrooms to previous conditions and conduct a final safety inspection. The Antilles Elementary School Outdoor Gymnasium and the Antilles High School Auditorium will remain closed until more repairs can be made.

Check your school website to get details about the assessment process, findings and repairs being completed. If you have any questions that have not been answered please contact your school's administration for assistance. All three school offices are up and running.

Your patience and understanding during this very unusual circumstance is greatly appreciated. We are excited about having a firm plan for the opening of school. All of our staff members are looking forward to the return of students to campus.
