Measuring

## FOR FAMILIES

### Helping Your Child Learn

Children need lots of practice in counting and writing numbers. Find meaningful ways to practice these skills.

#### You can:

- Read counting books with your child such as *Anno's Counting Book* by Mitsumasa Anno, or *So Many Cats* by Beatrice Schenk de Regniers. You can probably find them at your public library.
- Help your child learn to write your phone number. This number will be meaningful to him or her.
